ULTIMATE6 M PRO E

Touring handlebar bag with power connection

Option to connect to cable
Contact points to mounting block
on handlebar

Handlebar bag mounting with reflective
foil (lockable) included
Contact points to handlebar bag frame

- A transformer (available separately) converts the AC voltage provided by the hub dynamo into electric power for mobile end devices. The converter may be positioned outside the bag (e.g. Busch + Müller light "Luxos U Lumotec IQ2" or Supernova "The Plug") or inside (e.g. Busch + Müller "E-Werk").
- The contact points in the mounting elements are automatically separated as the bag is taken off the mounting.
- Electricity generated by the hub dynamo is provided for charging mobile devices inside the bag or for operating devices such as GPS inside the transparent lid.
