

Coperton

Indoor Training Tire

Coperton Indoor Training tire

- **Dimensions:** 23 – 622 (700 x 23 C)
- **Colour:** red with white walls
- **Specially designed and developed for indoor training**
- **Quietness and comfort:** the tyre coming into contact with the trainer roller is designed to ensure free spinning thus reducing vibrations, noise and offering increased comfort during training
- **Heat dispersion:** thanks to it's special tread pattern, the tyre won't heat up like a road tyre. It offers better heat dispersion thus reduces heat build-up generated due to friction on the roller and the power developed during training
- **Excellent grip between tyre and trainer roller:** the compound used offers a better grip compared to conventional tyres, reducing slippage especially when training at high power levels
- **Long lasting**
- **Increases trainer roller life:** thanks to the tyre's specific characteristics and functions for indoor training, the roller undergoes less stress and therefore lasts longer
- **Easy to assemble:** extremely soft at the sides, it enables very easy fitting on the rim
