

Battery Mount

User's manuals in other languages are available at :
<http://si.shimano.com>

IMPORTANT NOTICE

- Contact the place of purchase or a bicycle dealer for information on installation and adjustment of the products which are not found in the user's manual. A dealer's manual for professional and experienced bicycle mechanics is available on our website (<http://si.shimano.com>).
- Do not disassemble or alter this product.

For safety, be sure to read this user's manual thoroughly before use, and follow them for correct use.

Important Safety Information

Guidelines that require replacement, contact the place of purchase or a bicycle dealer.

WARNING

- After reading the user's manual carefully, keep it in a safe place for later reference.

Note

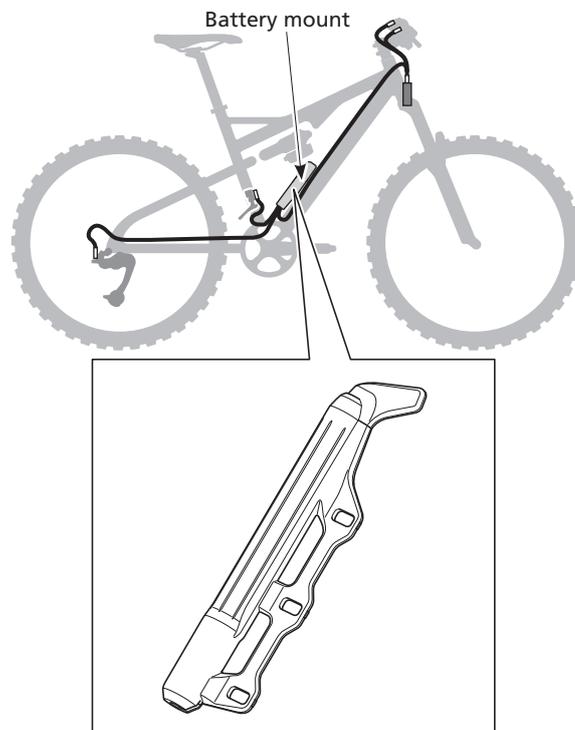

- This is a small waterproof connector. Do not repeat connecting and disconnecting it. It may impair the function.
- Do not clean the bicycle using a high-pressure washer or leave in water. If water gets into any of the components, operating problems or rusting may result.
- Be careful not to let water get into the terminal.
- Be sure to attach dummy plugs to any unused terminals.
- Do not use thinners or similar substances to clean the products. Such substances may damage the surfaces.
- Handle the products carefully, and avoid subjecting them to any strong shocks.
The internal battery may become damaged. If the product has been subjected to a shock, please consult a dealer.
- When using the product, read the user's manual for the battery (SM-BTR2) as well.
Improper use of the battery may cause leakages, overheating, or bursting and result in fire, burns, or other injuries.
- Connection and disconnection of the electric wire from the SM-BTR2 battery is required to reset the Di2 system. Consult a dealer.
- Products are not guaranteed against natural wear and deterioration from normal use and aging.
- For maximum performance we highly recommend Shimano lubricants and maintenance products.

Regular inspections before riding the bicycle

Before riding the bicycle, check the following items. If any problems are found with the following items, contact the place of purchase or a bicycle dealer.

- Is the battery mount attached accordingly?
- Are dummy plugs attached to the unused terminals?
- Is there sufficient charge remaining in the battery?
