

Bottle Syssa 750 ml

Technical data:

- _ total height: 245 mm
- _ diameter: 74 mm
- _ capacity: 750 ml
- _ weight: 180 gr

Materials:

- _ bottle body: highly resistant aluminium alloy
- _ cap: food-grade polypropylene and food-grade thermoplastic rubber.

Colors:

- _ black, silver, white

Bottle features:

_ **design:** this modern and strong design was inspired by plastic bottles currently used in cycling competition. The standard diameter (74 mm) works with all regular bottlecages currently on the market. The smaller diameter upper bottle body improves the grip and handling of the bottle under all conditions. The wide bottle mouth (diam. 56 mm) makes it quick and easy to clean and refill.

_ **Push-Pull Cap:** ideal for cycling-sports with its 3 main features:

1. protective cap that guarantees a clean and hygienic nozzle area;
2. new push-pull soft rubber valve for easier opening and closing while cycling and improved liquid flow;
3. Screw cap for easy cleaning and refilling.

_ **Food safety:** the bottle is CE and FDA approved for food contact.

_ **BPA Free:** bottle components are totally BPA (bisphenol A) free.
